

Simplifying Nigeria's VISA Application and Renewal Processes.

Problems

Corrupt System: What applicants encounter when applying or renewing for Visa especially for Nigerians is very not acceptable. With the experience I had working As an Air Ticketing Officer I will not fault the embassy nor the applicant rather I will blame the corrupt system we are living in.

Greed and selfishness among the government has created the inability to provide infrastructure, employment, security e.t.c which has made most of our youth to be unskilled, leading them to seek greener pastures in other countries. Thereby, becoming liabilities and conjoining countries they are found in, leading the embassies to emotionally abuse their applicant especially Nigerians.

Solution

Quality Education from grassroot: Education has been the key to development. Knowledge is innovation, and innovation is power. Our government needs to discipline herself in order to create necessary requirements such as providing schools, steady electricity, teaching self-discipline, create new impressions to the outside world for us to regain our value and prestige. This solution is not only pointing to visa applications but for all international activities in general.
